

**Name:** Susanna Morgan

**Summary:** Best Doctors put an end to Susanna's excruciating pain

### **Background:**

A tailbone injury was making it difficult for Susanna to do anything. Even sitting was painful. The intense pain was forcing her to spend 20 hours a day lying down. She was unable to live her life.

Worst of all, the source of her discomfort remained a mystery to her treating physicians. Then Susanna turned to Best Doctors for help.

### **Treatment:**

Best Doctors contacted a leading orthopaedic surgeon, whose report recommended a specific exam to determine the cause of her condition. This exam ultimately served as a guide for surgery.

### **Outcome:**

Susanna is now on the mend. With each day, she's more and more active. She is in control of her condition and getting back to the life she has missed for so long.

*"The pain was really limiting my daily activities and social life... When the anaesthesia had worn off, I could hardly believe it. The pain was gone!"*

*Susanna Morgan*
